

A group of diverse office workers in a modern, bright workspace with large windows and desks. They are smiling and looking towards the camera.

DevOps Engineer for Cloud environments (f/m/d)

What is the mission of Namirial DevOps? We write code to automate manual processes, deploy, administer and maintain systems and services, and protect and defend uptime. Our team creates instrumentation and tools to identify and resolve system and code issues and increase system performance and efficiency. We take great pride in systems that run well, are responsive and available. Lastly, we do all of this while simultaneously constantly improving our system and network security.

YOUR RESPONSIBILITIES

- Develop and maintain deployment automation software
- Develop and maintain logging, monitoring, and alerting tools
- Respond to and resolve availability incidents
- Help identify incident root cause
- Develop and maintain solutions to eliminate incident root cause

YOUR PROFILE

- Computer Science or related relevant degree or ability to demonstrate equivalent experience
- Interest in computer networks and systems administration
- Understanding of security concepts
- Experience working in AWS (EC2, RDS, ELB, Lambda, security and rights concepts)
- Scripting/Programming experience (ideally Node.js, Python, PowerShell, C#)
- Experience with Infrastructure/Deployment automation (ideally Terraform)

OUR OFFER

- Working in an exciting and innovative market environment
- Flexible working hours and uncomplicated holiday planning
- Dynamic and open-minded working atmosphere with attractive benefits
- An international and motivated team that welcomes YOU!

SALARY

The salary is 53.500 EUR gross (excluding overtime) per year. We are willing to pay more, consistent with market value and dependent upon qualifications and experience.

LOCATION

Haider Straße 40a,
4052 Ansfelden
