

QA Test Automation Engineer (f/m/d)

You work independently, you have analytical skills and you enjoy technical challenges? Then become part of our QA team and ensure the best quality of our complex business solutions.

YOUR RESPONSIBILITIES

- Execution of tests on our web and mobile applications and evaluation and analysis of the test results
- Conception of test strategies for complex business software solutions
- Definition of step-by-step test instructions based on abstract feature descriptions, identification of relevant conditions to verify a successful test result
- Development and expansion of automatic tests and process optimization
- Creating test documents and test case catalogues based on specifications and user stories
- Review of change requests and releases
- Review of software bugs that have been reported and fixed, to implement test cases for that scenarios as well

YOUR PROFILE

- Several years of experience in test automation with Selenium and Protractor or similar testing tools for web technology
- Experience with Gatling or performance testing tool is an advantage
- Experience with Jira, Confluence, Jenkins, Bamboo, Jenkins und C#/.NET are an advantage
- ISTQB certifications an advantage
- Team player with ability to work autonomously in daily routine tasks as well as good communication skills in English

OUR OFFER

- Working in an exciting and innovative market environment
- Flexible working hours and uncomplicated holiday planning
- Dynamic and open-minded working atmosphere with attractive benefits
- An international and motivated team that welcomes YOU!
